Martinique waters offer warm temperatures (80 to 86°F), whatever the depth is an array of colors, exceptional visibility and calm conditions. The variety of colors comes from the corals, sponges, gorgona, anemone and the numerous small Caribbean fish.

They all twirl all around the diver, giving him/her an explosive show of color!

Explore the little Pompeii of the Caribbean, near Saint Pierre, classified city of Art and History. Go for a dive "through time", and explore the shipwrecks of ships sunk by the volcanic eruption of Mount Pelee in 1902....
